Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Thursday 04 Feb 2021

UK Outlook for Friday 19 Feb 2021 to Friday 5 Mar 2021:
Very low confidence for the middle of the month as there is a continued chance for unsettled, milder interludes arriving from the west or southwest. This produces a risk of disruptive snowfall during transition periods. Increased confidence at the end of February and the start of March for cold and mostly dry conditions. However, there remains a greater than normal threat of disruptive winter hazards for all areas most of February, with snowfall possible for all areas, but most likely in the east.
